SMC Summer School

I'm really interested in being part of the SMC Summer School, It will be a really great opportunity. I hope my profile will interest you.

I'm a sound technician and computer music Master student at Université Jean Monnet, Saint-Étienne. I Graduated from an audiovisual and sound techniques diploma in Cannes, and a new technologies in sound diploma in Toulon.

Thanks to my studies and my personals projects, I work a lot, with interfaces and languages such as PureData / MaxMsp, Faust, Supercollider... and i tend to create physical or digital objects for artistic and musical uses. And also as a sound technician on many softwares and applications for spatialized projects, digital arts projects and interactive comtemporany art exhibits.

I'm also really involved in the Live-coding scene in France, under my project Ralt144MI, and i try to organise events and Live Show around Lyon, France. It's a live-coding project focused on an underwater universe. It's an experimental project about scuba-diving driven by family tapes of underwater shots.¹

In all my musical projects i work a lot on communications between visuals and audio materials, through the use of computer music and new technologies , with a great affect for the use of analogue visuals.

And i'm involved in the counter-culture and underground culture in Lyon, France by being a volunteer as sound engineer, electronic technician for tape recorders and old sound gears, and webdesigner for places such as Grrrnd Zero². Where i also organized live-coding events³.

I would love to have the opportunity to be part of the SMC Summer School,

Yours Sincerely,

Rémi
